

LIFE CHOICE®

Life Choice® Skin Creams

Our skin treatment line yields results that only real nourishment can provide. We use pure ingredients such as DMAE, Vitamin C Ester, Organic Aloe Vera and Avocado Oil. These ingredients, combined with other natural elements, smooth out skin imperfections even during tissue restoration. Personally formulated by Eldon Dahl, Doctorate in Natural Medicine, these products are the result of years of perfecting formulations until the exact balance was found, the consistency was perfect and the feel was delectable. We are extremely proud of this group of products, which compares favorably with the most expensive boutique skin-treatment products. All our skin creams contain only natural preservatives for stability purposes, and the fragrances used are light, fresh, and fleeting so they do not conflict with other perfumes or cause allergic reactions for those with sensitivities.

Life Choice® Capsule Fillers

Only when needed, we use minimal amounts of fillers for capsule fullness, and use only microcrystalline cellulose from a vegetable source. The capsule shell is vegetarian source cellulose with no animal source gelatin.

We choose the correct capsule size for each application in order to reduce the need for extra fillers. This increases the time it takes to produce the products; however, with less filler, the active ingredients are better preserved and absorbed. Many manufacturers use larger capsules for all products, thus reducing man hours but increasing the amount of filler required.

CAPSULE SIZE:	MAXIMUM FILL WEIGHT:
"4"	210 ± mg
"3"	300 mg ± 3 mg
"2"	370 mg ± 5 mg
"0"	680 mg ± 6 mg
"00"	910 mg ± 7 mg
"00E"	1,140 mg ± 8 mg
"000"	1,370 ± mg

All Life Choice® products are individually licensed by Health Canada and carry either an NPN (natural product number) or DIN-HM (drug identification number for homeopathic formulas) and are manufactured using GMP (good manufacturing practice) procedures and 3rd party after product testing.

Life Choice® is committed to providing licensed products that distinguish themselves as an effective alternative to allopathic medicine. We maintain that the very best raw materials, professional innovation and diligent evaluation produces optimum results for the consumer.
