## Fertility

Fertility is a hot topic these days – the biological clock is ticking for both men and women. For men, erectile dysfunction and declining sperm count are the major concerns, especially after the age of 41. In fact, between the ages of 41 and 45, male fertility decreases 7% per year. For women, ovulation has steadily declined over the last 30 years. If conception is achieved, frequent miscarriages point to the deterioration of the human reproductive system. These challenges are significant, but they can be overcome. Lifestyle choices are one important piece of the puzzle. Eating healthy, not smoking, drinking only in moderation, limiting exposure to chemicals, and keeping smartphones at least 1 foot from the genital area can be helpful. GMOs are also dangerous, and avoiding them is crucial, especially for couples trying to conceive. If you're looking to have a child, it's also a good idea to avoid hot tubs, as sperm like cool temperatures.

Natural supplementation can also be helpful, provided that you do your homework to find a product that has natural ingredients with a proven track record. Life Choice® has a licensed male enhancement product, Fiery Male®, which helps enhance male physical capacity and performance. The components of this formula are designed not as a shortcut, but as one piece of the fertility solution. Ingredients such as Panax ginseng root, royal jelly, horny goat weed, fermented L-Arginine, and a total of 16 clinically tested ingredients help Fiery Male® work from the inside out to balance hormones levels and, over time, produce reliable, lasting results.

L-Arginine by itself is also great for reproductive issues. Studies suggest that sexual maturity may be delayed by arginine deficiency, implying that arginine is useful in treating sterility in men. It is found in high concentration in the skin and connective tissues, making it helpful for healing and repair of damaged tissue. For women, the hormone balancing ingredients in Progest Liposome Cream have shown their ability to increase the reproductive system, reduce vaginal dryness, and lessen anxiety and irritability. Balanced Female works in conjunction with Progest Cream, balancing hormones from the inside out. A couple recently mentioned that they were worried about their ability to conceive. The gentleman started taking Fiery Male and L-Arginine, while the lady was on Balanced Female. Much to their surprise, soon after, she became pregnant with twins!

When it comes to boosting virility and fertility, it pays not to take any shortcuts. Life Choice® never takes any shortcuts, and it shows in the therapeutic results of the products. All the raw materials Life Choice® uses are purchased based on the purest possible pharmaceutical grade and non-GMO, fermented amino acids, with United States Pharmacopeia (USP) quality – the same high quality that pharmaceutical companies use, and without the side effects. Selecting the precise ingredients with matching potency is critical when formulating for therapeutic results, and anything short of this will not be effective. There is no shortcut or quick fix when you want results. It comes down to quality in each and every component.
