Recovery H Cream has so many health benefits that the “H” could represent healing: a truly all-purpose healing cream for recovery. It helps to relieve minor burns (including sunburn) and assists healing of minor wounds and various skin irritations. Types of irritations include: rashes, eczema, poison ivy, poison oak/sumac, insect bites and vaginal itching.

As an astringent, it helps in the treatment of varicose veins and reduces the pain and swelling associated with anal fissures. It is also a pro-sexual compound, which can be helpful for erection maintenance or personal lubrication (safe for oral use). The ingredients have also been known to increase testosterone levels over time, which is eventually measurable in urine samples. Recovery H Cream is both anti-inflammatory and anti-bacterial, and a healing, soothing alternative for whatever your skin needs.
