

### Melapure<sup>®</sup> Melatonin (#14 / #14A)

3mg NPN# 80021127  
Liquid NPN# 80018971

Relieves insomnia, and promotes a good night's sleep. Eases jet lag without the apparent adverse side effects of other remedies. Liquid melatonin has controlled delivery; it is easy to administer and has a great mint taste.

Life Choice<sup>®</sup> Melapure<sup>®</sup> Melatonin is a well tolerated, non-habit-forming agent which does not produce grogginess. For anti-aging purposes, 1 mg of melatonin is the daily amount needed to stimulate serotonin release through the pineal gland in order to reset the body's aging clock.

Studies recently indicate melatonin may bolster our immune system, slow the growth of cataracts and tumors, and help fight off heart disease, all of which are exacerbated by stress.

Melatonin-DMF Clinical Studies suggest the nutrient may help prevent cancer

**Ingredients:** Melatonin 3mg    Liquid: Each 7 drops = 1mg

*Life Choice<sup>®</sup> uses the purest source of 100% USP and DMF (drug master file) patented pharmaceutical-grade melatonin that guarantees superior results. This raw material is clinically researched, and the quality is proven to be consistently high with each order. Vegan and Non-GMO. Note: Those that may be allergic to melatonin may in fact be allergic to the sourcing of melatonin and not to the hormone melatonin itself.*

Melapure<sup>®</sup> Melatonin derives its melatonin synthetically from 5-Methoxytryptamine. Melatonin is synthesized through a chemical pathway that uses the amino acid tryptophan as its precursor molecule.

Natural melatonin may pose a risk to humans because it can be contaminated with animal viruses. USP synthetic grade melatonin is safer to use because it is free from biological contaminants.

**3mg Dosage:** Adults take 1 capsule once daily on or before dinner time or as directed by your health care provider. For use beyond 4 weeks, consult your health care provider.

**Liquid Dosage:** Adults take 15-45 drops (0.5ml-1.5ml) per day. Add to glass of water (200ml) on or before bedtime or as directed by your health care practitioner.
