

### Weight Loss Support

There is no magic pill, but there are components necessary in order to achieve weight loss. So many fall victim to products that just don't work, and out of desperation they try and try again. Weight gain and loss are governed by our glands and hormone activity, as well as diet and activity levels throughout the day.

To achieve weight loss, supplements must be designed to the body's functional needs. No single ingredient can fit the body's criteria, and the sourcing of the ingredients is paramount. Life Choice® offers therapeutic solutions to achieve weight loss working in synergy and by design.

Our new *Active Woman* is derived from fermented amino acids, herbs, vitamins and minerals, working together to produce energy, improve muscular definition, and suppress the appetite. *Lean Night* is designed to release HGH as you sleep. Lean Night uses fermented amino acids, the body's natural building blocks of protein; they are safe and available without prescription. Life Choice® *Thydracut™* is a unique weight loss formula which combines nutraceuticals and homeopathic ingredients. It is designed to increase metabolism by stimulating the production of adrenaline and thyroxin, both key hormones for raising the Basal Metabolic Rate in order to burn fat. Our new *Cardio Support* formula promotes cardiovascular health, which is crucial during exercise.

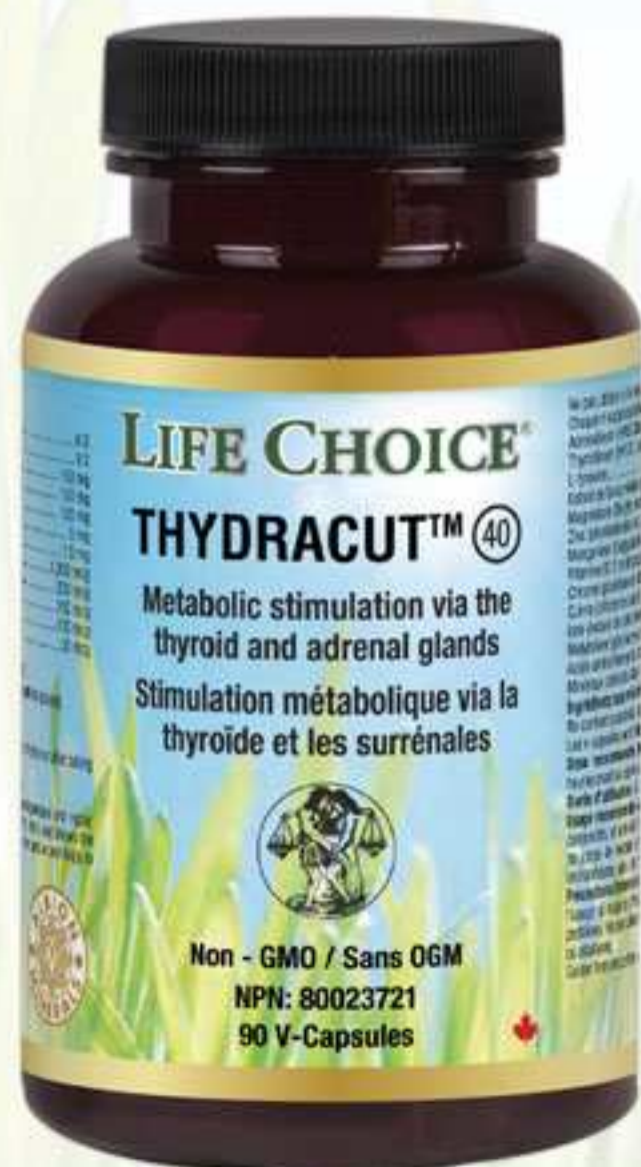

**Trust Life Choice® for your weight loss needs!**
